[secure](#) [sdcardcase](#)

A flat holder for 6 SD cards. Each card is held in place by a flexture latch that still permits easy insertion and removal. Cards can be inserted in any orientation and still remain secure. The flexture also holds micro SD cards in their SD card adapters.

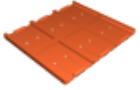

The lid also has a flexture latch to hold it on. The lid can cover the SD cards or leave their labels showing, both orientations prevent removal of the cards.

0.2mm layer height is recommended, and using 4 or more perimeters leaves a nice top side finish. All fits have a little play to ensure smooth operation, but can lead to a little bit of noise if shaken. Printed in under an hour on a Prusa MK4
